PROFILE

Frontend-focused Full-Stack Developer who builds and ships production React applications with Tailwind CSS, Node.js, and PostgreSQL. Founded Swiftly, a live campus e-commerce platform that has processed 100 orders, and built three more deployed web apps. Comfortable across responsive UI development and REST API design, and currently expanding into Docker, CI/CD, and AWS. Computer Science student at the University of Ilorin.

EXPERIENCE

Founder & Lead Developer — Swiftly March 2026 – Present | swiftlyweb.shop

- Founded and built a full-stack e-commerce and delivery platform for the University of Ilorin community, processing **100 orders**.
- Built a responsive React and Tailwind CSS frontend with a product catalog, cart, and order management, backed by a Node.js/Express REST API.
- Introduced WhatsApp-based ordering to simplify checkout for a mobile-first campus audience.
- Deployed on Vercel and iterated on live user feedback.
- Led architecture, database design, UI/UX, and deployment end to end.

PROJECTS

Agro-Help | React, Tailwind CSS, Node.js, Express, Gemini API agro-help-nine.vercel.app

- Built an agricultural support platform for Nigerian farmers with an AI farm advisor (Google Gemini API), a labor marketplace, weekly farming tips, and a solar energy calculator.

Seeker | React seeker-omega-henna.vercel.app

- Built a Web3 and remote job discovery platform with fast search and filtering.

CGPA Tracker | React, Vite cgpa-tracker-kappa.vercel.app

- Built a responsive web app where students enter course scores to instantly calculate their CGPA, with a visual chart and a progress page tracking improvement and decline across semesters.
